Year of establishment	1946
General description of activity	VTT, the Technical Research Centre of Finland, is a government organisation established by law and operating under the auspices of the Finnish Ministry of Trade and Industry. 2800 employees with turnover of over 200 M€. VTT operates under the public mandate established for it by The Technical Research Centre of Finland Act (144/72). This mandate requires VTT to develop and manage strategic research activities in the interest of the Finnish economy and society and thereby to help create the prerequisites for growth, employment and well-being. These research activities are planned and implemented as multi-year, coordinated research programmes. VTT's objective is to develop new technologies, create new innovations and value added thus increasing customer's competitiveness. With its know-how VTT produces research, development, testing and information services to public sector and companies as well as international organisations.
