Regional Construction Clustering in Action

Case study Showcase

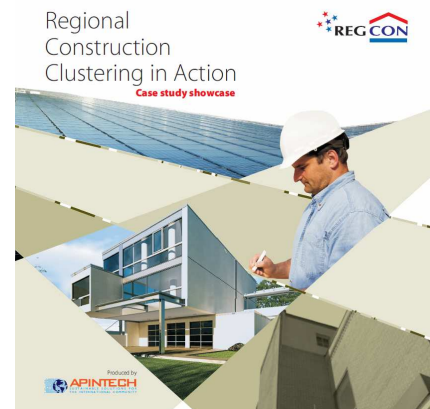

Overview

The REGCON project has enabled three European regions, in Poland (Lodz), Greece (Crete) and Spain (Basque country), to advance the concept of collaboration and clustering in the construction sector. Two other countries (Finland and Slovenia) assisted and mentored this process all along the two year period. Each region has now developed its own action plan, for taking the practice of construction clustering further. This booklet provides some insight into the plans and aspirations in these three regions, as well as a sample of case studies, of a different level of maturity, originating from all five participating countries (Poland, Greece, Spain, Finland and Slovenia). These case studies highlight cases on innovation in construction and demonstrate the clustering concept in action.

This publication aims at presenting the case studies from 5 countries participating in REG CON project, in a similar layout, comprising six paragraphs:

- In short, snapshot of the case study
- Abstract, short, concise description of the case study
- Promoters, i.e., organizations behind the case study
- The service aspect, i.e., description of the value delivered
- The innovation aspect, i.e., description of the innovative aspects of the case study
- The co-operation aspect, i.e., description of the co-operative aspects of the venture

The case studies include the description of clusters that were set up in the framework of REG CON project as well as collaboration within the clusters between business and research units.

Case Studies:

- 📄 No.1- Accessible construction, GR
- 📄 No.2- Health care construction- The HospiTool consortium, FI
- 📄 No.3- Basque country construction clustering, ES
- 📄 No.4- Photovoltaics in buildings, GR
- 📄 No.5- Revitalisation of postindustrial urban areas, PL
- 📄 No.6- Construction Cluster of Slovenia, SL
- 📄 No.7- 3D printouts in architectural design, GR
- 📄 No.8- Vaino Korpinen Oy Finland, FI
- 📄 No.9- Construction Cluster of central Poland, PL
